ABOUT THE COURSE

Your This course covers ecological principles and their application to current global environmental issues, such as species, global warming, ozone depletion, changes in biodiversity, and energy issues. The importance of common property resources and their management are discussed.

Preparing for Civil Services exam conducted by UPSC, students usually miss some key issues cum facts like, the major happenings, decisions, achievements & challenge- in Summits, Protocols, COPs, Environment Laws etc, and they hold great potential in all stages of exam.

This course is strategically designed to cover important elements for both Prelims & Mains exam. paragraph text
